

MAILBOXES & CAMPAIGNS

How the sending setup runs

01 · WARMUP

Every mailbox warms up for 21 days

Instantly runs warmup automatically once a mailbox is connected. **21 days minimum** before it sends a single cold email, and domain age doesn't count. **Leave warmup on after launch**, it holds reputation up while campaigns run. At full speed each mailbox sends **15 cold emails a day**, so 450 a day across 30 mailboxes.

02 · TAGS

Four tags, one per mailbox

Campaigns pull their senders **by tag**, so you move a mailbox between campaigns by changing its tag, never by picking addresses by hand.

TAG	MEANING	WHEN IT GETS USED
warming	New mailbox, still in its 21 days	Swap for insurance when warmup finishes
insurance	Warmed and ready, no campaign yet	The standby pool you pull replacements from
camp-<name>	Sending for one campaign, e.g. camp-flooring	New campaign: create the tag, put it on the mailboxes you want sending, set Accounts to use to that one tag
recovery	Health below 98%, resting on warmup only	Remove its camp- tag, add this, pull a replacement from insurance . Back at 98%+, return it to the campaign. Still low after two weeks, retire it

TWO RULES THAT BREAK THINGS

One tag per mailbox (remove the old one when you add the new one) and **one tag per campaign**, because Instantly treats two selected tags as "or" and quietly pulls in mailboxes you didn't intend.

03 · CAMPAIGN SETTINGS

Set these every time

SETTING	VALUE
Accounts to use	One camp- tag
Daily limit / mailbox	15
Schedule	Mon–Fri, 8am–5pm, lead's timezone
Stop on reply	On
Open tracking	Off
Link tracking	Off
Block list	Your customers + open deals

SEQUENCE	SEND	PURPOSE
Step 1	Day 1	The offer, short
Step 2	Day 3	Same thread, new angle
Step 3	Day 7	Short close-out

Why: tracking pixels and rewritten links are spam signals, and opens don't book appointments. Three steps because the market is only ~12,000 businesses, so extra touches burn the list. Plain text only.

BEFORE A CAMPAIGN GOES LIVE

Mailboxes 21+ days warmed and at 98%+ · list verified and block list loaded · one **camp-** tag selected · tracking off, stop-on-reply on, limit 15 · spam test passed from those same mailboxes.
